

DayFlow

Daily Planner Web App — Product Requirements Document

Version 1.0 · March 2026 · Confidential

Product Name	DayFlow
Document Type	Product Requirements Document (PRD)
Version	1.0
Date	March 26, 2026
Author	Product Team
Status	Draft — For Review

1 EXECUTIVE SUMMARY

DayFlow is a **beautiful, gamified daily planning web application** that empowers users to organise their day, prioritise tasks intelligently, track completion, and celebrate progress through a reward system. It combines the productivity of a structured planner with the engagement of a game — keeping users motivated and on track every single day.

User Personas	Core Features	MVP Phases	Launch Target

2 PROBLEM STATEMENT

Most people struggle to stay consistent with their daily plans. Existing planner tools are either too rigid, too plain, or offer no feedback loop. There is a clear gap for a tool that is **visually delightful**, adapts to user priorities automatically, and provides **positive reinforcement** upon task completion.

- No automatic re-ordering based on task priority.
- Lack of visual feedback and rewards reduces motivation.
- Cluttered UIs make daily planning feel like a chore.
- No intelligent distinction between urgent and important tasks.

3 GOALS & OBJECTIVES

ID	Objective	Type
G-01	Enable users to create and manage daily tasks with ease.	Business

G-02	Auto-sort tasks by priority (P0 → P1 → P2) in real-time.	Product
G-03	Allow users to mark tasks complete with satisfying visual feedback.	UX
G-04	Reward users with points, badges, and streaks on completion.	Engagement
G-05	Deliver a world-class, polished UI that users love to open every day.	Design

4 USER PERSONAS

■ The Student

Age 18–25. Juggles assignments, part-time work, and personal goals. Needs a quick way to dump tasks in the morning and focus on what matters most. Motivated by streaks and completion badges.

■ The Professional

Age 26–40. Manages multiple projects and meetings. Wants a clean, distraction-free interface they can glance at between calls. Values priority intelligence and time-blocking features.

■ The Self-Improver

Age 20–45. Building habits and personal goals alongside daily tasks. Craves rewards, progress graphs, and motivational nudges to stay consistent.

5 FEATURE REQUIREMENTS

Feature	Description	Priority	Phase
Task Creation & Management	Add, edit, delete tasks with title, description, due time, and optional notes.	P0	Phase 1
Priority System (P0/P1/P2)	Each task gets a priority label. The list auto-sorts — P0 at the top, P2 at the bottom. Re-sorting is animated.	P0	Phase 1
Task Completion & Check-off	One-click completion with a satisfying animation (confetti burst, strike-through). Completed tasks move to a 'Done' section.	P0	Phase 1
Reward & Gamification System	Earn XP points per task completion based on priority. Unlock badges (First Task, 5-Day Streak, etc.). Display a daily progress bar.	P1	Phase 1
Streak Tracker	Track consecutive days where at least one task was completed. Display current and best streak prominently on the dashboard.	P1	Phase 2
Daily Summary & Stats	End-of-day summary card showing tasks completed, XP earned, and a motivational message.	P1	Phase 2

Feature	Description	Priority	Phase
Drag & Drop Re-ordering	Allow manual re-ordering within the same priority tier via drag and drop.	P2	Phase 2
Dark Mode	Full dark theme support with smooth toggle. Persisted via localStorage.	P2	Phase 2
Recurring Tasks	Mark tasks as daily/weekly recurring so they auto-populate each day.	P2	Phase 2

Priority Legend: **P0** = Must Have (MVP) · **P1** = Should Have · **P2** = Nice to Have

6 UI / UX REQUIREMENTS

The interface must feel **premium, modern, and delightful**. Below are the non-negotiable design standards for DayFlow:

Design Language	Clean, card-based layout. Generous whitespace. Rounded corners (8–16px). Subtle shadows. Inspired by Linear.app and Notion's minimalist aesthetic.
Colour Palette	Primary: Indigo (#4F46E5). Accent: Amber (#F59E0B) for rewards, Emerald (#10B981) for completions. Neutral background: Slate (#F8FAFC).
Typography	Inter or Geist Sans for headings. System UI font stack for body. Font sizes: 24px title, 16px task title, 13px metadata.
Animations	Task completion: confetti micro-animation + strike-through slide. Priority sort: smooth animated list reorder (300ms ease). Badge unlock: pop-up toast notification.
Responsiveness	Fully responsive. Mobile-first layout. Touch-friendly tap targets (min 44px). Desktop layout uses a two-column view (task list + stats sidebar).
Accessibility	WCAG 2.1 AA compliant. Keyboard navigable. Sufficient colour contrast ratios. ARIA labels on all interactive elements.

7 RECOMMENDED TECH STACK

Layer	Technology	Rationale
Frontend Framework	React (Next.js 14 with App Router)	SPA + SSR capabilities
Styling	Tailwind CSS + shadcn/ui component library	Rapid, consistent UI
Animations	Framer Motion	Smooth task animations
State Management	Zustand	Lightweight, simple

Database	Supabase (PostgreSQL)	Auth + real-time sync
Hosting	Vercel	Zero-config deployment
Rewards Storage	localStorage (Phase 1), Supabase (Phase 2)	Progressive enhancement

8 PHASED ROADMAP

Phase 1 — MVP	Weeks 1–6
Scope:	Task CRUD · Priority labels & auto-sort · Task completion with animations · Basic XP & badge system · Responsive UI · Light/Dark mode toggle
Phase 2 — Enhanced	Weeks 7–12
Scope:	Streak tracker · Daily summary card · Drag-and-drop reordering · Recurring tasks · User accounts & cloud sync · Stats dashboard

9 SUCCESS METRICS

Metric	Target	Why It Matters
DAU / MAU Ratio	> 40%	User engagement / stickiness
Task Completion Rate	> 70% per day	Core product value delivery
7-Day Retention	> 50%	Product habit formation
Avg. Session Duration	> 5 minutes	Depth of engagement
Reward Unlock Rate	> 60% users	Gamification effectiveness
App Store / Product Rating	> 4.5 / 5.0	Overall user satisfaction

10 OUT OF SCOPE (V1.0)

- Native mobile apps (iOS / Android) — web-first approach for MVP.
- Team or collaborative planning features.
- AI-generated task suggestions or smart scheduling.
- Calendar integrations (Google Calendar, Outlook).
- Paid subscription / monetisation features.
