Design Approach

1 DESIGN OVERVIEW

TaskifyAI is a visually striking, dark-themed AI productivity application designed by **Vislume Studio**. The UI centres on a deep dark canvas enriched by vibrant purple-to-pink gradient accents, glowing card surfaces, and subtle glassmorphism effects. The design aesthetic communicates **intelligence, modernity, and focus** — perfectly aligned with an AI-first productivity tool.

The interface prioritises clarity and hierarchy through careful use of luminosity contrast: bright violet highlights draw the eye to AI-generated insights, while muted dark surfaces keep cognitive load low during deep work sessions.

2 VISUAL IDENTITY & BRAND LANGUAGE

2.1 Colour Palette

Violet Primary
#7C3AED

Pink Accent
#EC4899

Cyan Highlight
#06B6D4

Amber Warning
#F59E0B

Dark Surface
#1E1B4B

Colour Role	Hex	Usage
Violet Primary	#7C3AED	Primary CTAs, active states, AI badges, gradients start
Pink / Fuchsia	#EC4899	Gradient end, notification dots, reward highlights
Cyan	#06B6D4	Progress indicators, secondary highlights, charts
Amber	#F59E0B	Priority warnings, due-date alerts, streak counters
Dark Navy	#1E1B4B	Page background, deepest surface layer
Dark Surface	#2D2B55	Card backgrounds, modal backdrops
Muted Surface	#3D3A70	Input fields, sidebar items, hover states
Body Text	#E2E8F0	Primary readable text on dark backgrounds
Muted Text	#94A3B8	Metadata, timestamps, labels, secondary info

2.2 Typography

Role	Weight	Size	Usage Context
Display / Hero	Inter ExtraBold	40–48px	App name, hero headline, onboarding screens
Section Heading	Inter Bold	24–32px	Screen titles, modal headings
Card Title	Inter SemiBold	16–20px	Task names, feature card titles
Body / Description	Inter Regular	13–15px	Descriptions, AI summaries, paragraphs
Label / Tag	Inter Medium	11–12px	Chips, badges, category labels
Caption / Meta	Inter Regular	10–11px	Timestamps, word counts, subtitles
Monospace / Code	JetBrains Mono	12px	AI prompt inputs, code snippets

2.3 Elevation, Glass & Glow Effects

Layer	Background	Box Shadow	Used For
Level 0 — Base	Dark Navy #1E1B4B	0	Page background
Level 1 — Surface	Dark Surface #2D2B55	0 4 24 rgba(124,58,237,0.15)	Cards, sidebars
Level 2 — Elevated	Muted #3D3A70 + blur	0 8 32 rgba(124,58,237,0.25)	Modals, dropdowns
Level 3 — Floating	Glassmorphism overlay	0 16 48 rgba(0,0,0,0.4)	Tooltips, popovers

Layer	Background	Box Shadow	Used For
Glow — Active/AI	Violet border + glow	0 0 20 rgba(124,58,237,0.6)	Focused AI inputs

3 SCREEN INVENTORY & LAYOUT SPECS

The TaskifyAI design showcases a desktop-first full-screen layout with a persistent left navigation sidebar and a main content area. The overall grid follows a **3-column responsive structure** — sidebar / main panel / contextual detail panel.

Screen ID	Screen Name	Description
S-01	Dashboard / Home	Primary hub — today's tasks, AI summary card, progress ring, streaks, recent activity feed
S-02	Task List View	Full sortable/filterable task list. Priority pills, completion checkboxes, due dates, AI tag suggestions
S-03	Task Detail / Editor	Side panel slide-in. Rich text desc, priority picker, assignee, AI rewrite CTA, subtask checklist
S-04	AI Insights Panel	Full-width AI-generated productivity summary, smart scheduling suggestions, focus mode recommendations
S-05	Calendar / Timeline	Weekly/monthly view with task blocks. Drag to reschedule. Color-coded by priority
S-06	Analytics & Reports	Progress charts (Recharts), streak graph, completion velocity, category breakdown donut chart
S-07	Settings / Profile	User profile, notification preferences, AI behaviour toggles, theme customisation
S-08	Onboarding Flow	3-step onboarding — Goal setting, AI personalisation, first task creation

3.1 Layout Grid & Spacing System

Property	Value	Notes
Base Unit	4px	All spacing is a multiple of 4px (4, 8, 12, 16, 24, 32, 48, 64)
Sidebar Width	240px (desktop) / 64px (collapsed)	Fixed left nav with icon + label
Content Max Width	1280px	Centred on wide screens with side padding

Property	Value	Notes
Card Padding	24px	Internal padding for all card components
Section Gap	32px	Vertical gap between content sections
Border Radius	12px (cards), 8px (inputs), 20px (pills)	Rounded aesthetic throughout
Grid Columns	12-col (desktop), 4-col (mobile)	Content area uses flexible column grid

4

COMPONENT LIBRARY

All reusable components are designed in a **dark-mode-first** paradigm. Below is the core component set required for the TaskifyAI interface.

Task Card	Primary task unit — title, priority pill, due date, AI indicator, completion checkbox. States: default / hover / active / completed / overdue.
Priority Pill	Compact badge: P0 (red glow) / P1 (amber) / P2 (cyan) / P3 (muted). Rounded, 11px font, 4px 10px padding.
AI Badge	Gradient violet-pink badge with sparkle icon. Signals AI-generated content or suggestions.
Progress Ring	SVG circular progress indicator. Used on Dashboard for daily completion %. Animated stroke.
Streak Counter	Flame icon + count. Glows amber at 3+ day streaks. Pulses on new streak milestone.
Command Bar	Full-width AI input bar. Violet glow on focus. Placeholder: 'Ask AI or create a task...' Keyboard shortcut: Cmd+K.
Sidebar Nav Item	Icon + label. Active state: violet BG pill + left border accent. Hover: subtle surface lift.
Notification Dot	6px pink circle on avatar/bell. Animated pulse for new AI insights.
Action Button	Primary: gradient violet→pink. Secondary: dark surface + violet border. Ghost: no fill. Sizes: sm / md / lg.
Empty State	Centred illustration + heading + CTA button. Used when no tasks exist for a filter.
Toast / Alert	Bottom-right toast. Success (emerald), Warning (amber), Error (red), Info (violet). Auto-dismiss 4s.

Modal Overlay	Glassmorphism backdrop blur(12px) + dark overlay. Slide-up animation 250ms ease-out.
---------------	--

5

INTERACTION DESIGN & MOTION

Task Completion	Checkbox fills with gradient → strike-through slides right → card dims and drops to Done section. Duration: 400ms ease-in-out.
Priority Re-sort	List items animate to new positions using layout animation. Duration: 300ms spring(1, 80, 10, 0).
AI Response Stream	Text types character by character (typewriter effect) with a blinking violet cursor. Speed: 30ms/char.
Page Transitions	Fade + slight upward translate (8px). Duration: 200ms ease-out. All route changes.
Sidebar Toggle	Smooth width transition 240px→64px. Labels fade out. Duration: 250ms ease-in-out.
Card Hover	Subtle lift: translateY(-2px) + shadow intensification. Duration: 150ms ease.
Reward / Badge Unlock	Full-screen confetti burst (canvas) + modal pop. Badge scales from 0 to 1.1 to 1.0. Duration: 600ms.
Progress Ring Fill	Animated SVG stroke-dashoffset on load and on each completion. Duration: 800ms ease-out.
Drag & Drop	Ghost card with 80% opacity follows cursor. Drop zone shows violet dashed border. Snap animation on drop.

6

AI FEATURE DESIGN PATTERNS

TaskifyAI's identity revolves around AI assistance. Each AI touchpoint uses a consistent **Violet→Pink gradient + sparkle icon** language to signal intelligence. The following AI interaction patterns are defined in the design:

AI Feature	Priority	Interaction Design
Smart Task Creation	P0	User types natural language in the Command Bar. AI parses intent, auto-fills title, priority, due date, and suggests subtasks. Confirmation card slides up before commit.
Daily Briefing Card	P0	Dashboard hero card. AI summary of today's focus areas, pending items, and recommended task order. Regenerate button triggers re-stream animation.

AI Feature	Priority	Interaction Design
AI Priority Suggester	P0	When creating a task, AI badge appears with a suggested priority level + brief reasoning tooltip. User can accept or override.
Smart Scheduling	P1	AI analyses workload + time estimates and proposes an optimised daily schedule. Displayed as a visual timeline block in the Calendar screen.
Task Rewrite / Polish	P1	In Task Detail, 'AI Improve' CTA rewrites description in cleaner language. Shows diff: original (strikethrough) vs improved (violet highlight).
Blockers & Insights	P1	Detects tasks overdue 2+ days and surfaces a contextual insight card: 'You've postponed X 3 times — reschedule or delegate?'
Voice Input	P2	Microphone icon in Command Bar. AI transcribes + interprets voice to create task. Waveform animation during capture.

7

RESPONSIVE DESIGN BEHAVIOUR

Mobile (< 640px)	Single-column stack. Bottom tab navigation replaces sidebar. Cards go full-width. Command bar is sticky bottom bar.
Tablet (640–1024px)	Collapsible icon-only sidebar. Two-column grid for task list + detail panel. Dashboard widgets stack in 2 columns.
Desktop (≥ 1024px)	Full 3-panel layout: sidebar (240px) + task list + detail/AI panel. Full feature visibility.
Large (≥ 1440px)	Content constrained to 1280px max-width. Sidebar remains 240px. Extra whitespace on sides.

8

ACCESSIBILITY STANDARDS

Colour Contrast	All text on dark surfaces meets WCAG 2.1 AA (min 4.5:1 for body, 3:1 for large text). Violet on dark tested at 6.2:1.
Keyboard Nav	Full keyboard navigation. Tab order follows visual reading order. Focus rings: 2px violet outline, 2px offset. Skip-to-content link on all pages.
ARIA Labels	All icon-only buttons have aria-label. Dynamic AI content uses aria-live='polite'. Modal traps focus. Priority pills use role='status'.

Motion Preferences	All animations respect prefers-reduced-motion. Transitions replaced with instant state changes when enabled.
Screen Readers	Task completion events announced via visually-hidden live region. Progress ring has aria-valuenow, aria-valuemin, aria-valuemax.
Touch Targets	All interactive elements minimum 44x44px on mobile. Spacing between adjacent targets min 8px.

9 DESIGN TOKEN REFERENCE

The following CSS custom properties implement the TaskifyAI design system. These tokens should be the single source of truth across all components.

```
:root { /* Colours */ --color-primary: #7C3AED; --color-primary-dark:#5B21B6;
--color-accent-pink: #EC4899; --color-accent-cyan: #06B6D4; --color-warning: #F59E0B;
--color-success: #10B981; --color-danger: #EF4444; /* Gradient */ --gradient-brand:
linear-gradient(135deg, #7C3AED 0%, #EC4899 100%); /* Surfaces */ --surface-base: #1E1B4B;
--surface-card: #2D2B55; --surface-elevated: #3D3A70; /* Typography */ --text-primary:
#E2E8F0; --text-secondary:#94A3B8; --font-sans: 'Inter', system-ui, sans-serif;
--font-mono: 'JetBrains Mono', monospace; /* Spacing (multiples of 4px) */ --space-1: 4px;
--space-2: 8px; --space-3: 12px; --space-4: 16px; --space-6: 24px; --space-8: 32px; /*
Radii */ --radius-sm: 8px; --radius-md: 12px; --radius-pill: 20px; /* Shadows */
--shadow-card: 0 4px 24px rgba(124,58,237,0.15); --shadow-glow: 0 0 20px
rgba(124,58,237,0.60); }
```

10 DEVELOPER HANDOFF CHECKLIST

■ Design Assets	Figma source file with all components, variants, auto-layout frames, and design tokens
■ Icon Set	Phosphor Icons (outlined weight) — available via npm or CDN
■ Font Files	Inter (300/400/500/600/700/800) + JetBrains Mono (400/500) — Google Fonts
■ Image Assets	All illustration SVGs exported + optimised. No raster images for UI chrome.
■ Animation Specs	Framer Motion config exported per component (spring constants, duration, easing)
■ Prototype Link	Clickable Figma prototype covering all 8 screens + hover/active states
■ Component Docs	Storybook story per component with all states documented and live previewed

■ Token File	design-tokens.json exported from Figma for automated CSS variable generation
■ Redlines	Spacing, sizing, and grid annotations visible on all screens in Figma
■ A11y Report	Colour contrast checker results (Figma A11y plugin) attached
